## Express Technologies Opens New Headquarters

Leading TMS Technology Provider Expands to meet Market Demand

[www.xpresstech.com](http://www.xpresstech.com)

PITTSBURGH, PA – February 26, 2012 – Express Technologies, providers of the LoadTech TMS System, opened its new and expanded high-tech headquarters, providing significant advantages to its clients in the transportation and logistics industries.

The new facility enables the company to serve its customers quickly and more efficiently. New state-of-the-art technology ensures that the company will remain a leader in technology for logistics, transportation and distribution worldwide.

The relocation and large expansion accommodate Express Technologies' growing staff and allow for further planned growth. The offices enable research, development, technical support, training, marketing, and administration to be under one roof. This will improve internal operations, innovation, and response to the growing demand for the firm's products and services.

The facility boasts sophisticated R&D labs, expanded multi-media conference areas, and training rooms.

"This is an investment in our clients and in the future," noted Paul Maloney, President of the firm. "The new facilities provide greater value to our clients. Expanded staff enhances response to customers and to the marketplace. We are pleased to remain in Pittsburgh, where our aggressive staff expansion is supported by a region that boasts a highly educated and skilled workforce, as well as a firm commitment to high tech companies like ours. Our new headquarters are our springboard for further growth, at both our logistics data center and our headquarters."

Director of Transportation Solutions, Brandon Barnhart, adds, "Our facilities prepare us for the future. R&D, QA, training, support and implementation are streamlined. Our headquarters are tightly integrated with our nearby logistics data center, which serves global users and clients worldwide. Technologically and organizationally, the expansion positions Express Technologies well to serve existing, and new, clients and supports our rapid forecasted growth.

The new facility is located at **5500 Corporate Drive, Suite 310, Pittsburgh, PA 15237**, with convenient access to airport and interstate highways.
